

HARD FOAM

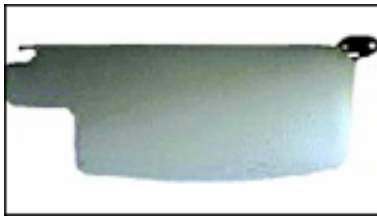

These are polyether based polyurethane foams with an increased hardness range, ideal for application in areas where additional support is required. The foam can be die-cut, milled and laminated with other fabrics.

Grades & Specifications

Grade	Nominal Density (kg/m ³)	Hardness 'N' (at 35% compression)	Applicable Standards	Typical Uses
523 Hard	23 _{±1}	735 - 800	IS-7888 ASTMD:3574	Laminated Fabric for Shoe Industry, Shoe Shiner
560 Hard	60 _{±3}	735 - 800	IS-7888 ASTMD:3574	Laminated Fabric for Shoe Industry
536 Hard	36 _{±2}	At 16% compression 900 - 950	IS-7888 ASTMD:3574	For Sunvisors in Auto Industry

Major Applications

- Mid-sole of shoes
- Shoe uppers
- Automobiles parts etc.

Automobile Sunvisors
